

V3Cloud Purpose-Built for Channel Partners

Straightforward, reliable, efficient, cohesive, scalable, multi-tenant, co-branded Infrastructure as a Service (IaaS)—elevate your IT business with V3Cloud by Hexagrid.

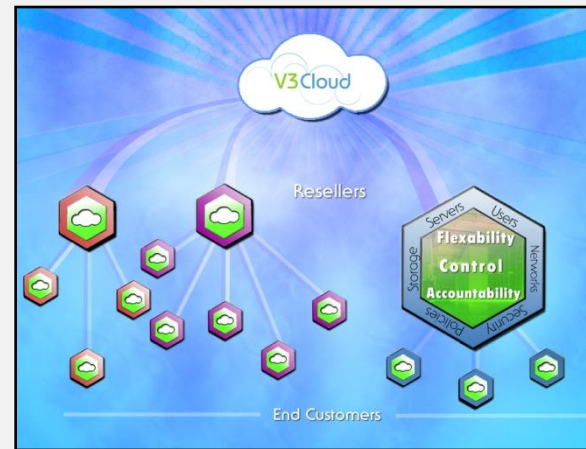

- Manage/deploy virtual computing resources at anytime from anywhere.
- Expand services portfolio to include IaaS, PaaS and SaaS offerings.
- Create a self-branded marketplace to sell third-party/proprietary virtual custom appliances.
- Access efficiencies to reduce operating costs and increase service capacity while retaining your existing business model.

As a Value Added Reseller (VAR), cloud capabilities provide an obvious advantage, so the strategic business question isn't 'if?' but 'how?'. V3Cloud simplifies this decision with a comprehensive cloud solution that provides top-of-the-line IaaS capabilities at a cost-effective price. When it comes to meeting the IaaS needs of resellers and service providers, there is no competition—V3Cloud is the answer.

V3Vision

Service providers can resell premium multi-tenant cloud computing resources under their own brand identity with minimal start-up costs and unlimited expansion potential. As business grows, V3Cloud responds with the elasticity, functionality, and reliability required by real-world IT delivery channels.

V3Cloud Features Summary

- Complete channel management functionality and co-branding capability
- Secure network segregation of multi-tenant architecture with policy-based user management
- Unified control portal integrates monitoring, auditing, billing, and accounting systems
- Self-provisioning capacity for total IT infrastructure management (network, compute, and storage)
- Dedicated virtual appliances and private datacenter services
- High-performance storage integration, workload scheduling, and fault-tolerance
- IT Service Desk integration
- Hexagrid's 24 x 7 Support Services

V3Cloud Purpose-Built for Channel Partners

V3Cloud combines Hexagrid's revolutionary VxDatacenter technology with a solid network of top-tier datacenter suppliers, delivering optimal IaaS capabilities with minimal start-up costs and unlimited expansion potential.

Minimal Start-Up Costs

VARs on V3Cloud quickly and easily access all of the competitive advantages, operational efficiencies, and business growth opportunities available through Infrastructure as a Service (IaaS) without owning expensive hardware and datacenter space. In addition, V3Cloud's pay-as-you-go pricing means that you only pay for the IT resources that you use without hidden CPU or memory fees to pay when your virtual servers are powered off.

Unlimited Expansion Potential

With V3Cloud, VARs grow business through value-added service capabilities and IaaS operating efficiencies—scaling capacity without scaling manpower. As business grows, V3Cloud automatically upgrades and expands capacity to accommodate fluctuating needs. If service providers purchase hardware and datacenter space, the seamless transition from V3Cloud to VxDatacenter will go unnoticed by end-users who never experience any downtime. Through all of these transitions, your employees and customers remain confident and productive using a familiar virtual resource management system.

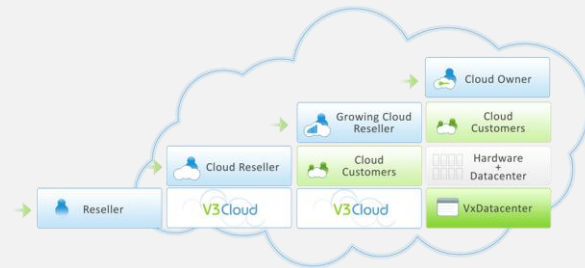

VxDatacenter Technology

Hexagrid's state-of-the-art VxDatacenter platform is a comprehensive cloud solution specifically designed for real-world IT delivery. This tightly integrated platform provides unprecedented control and agility enabling IT organizations to deliver all the benefits of today's popular commodity clouds without all the hassles. With VxDatacenter, service providers spend little or no time on the racks and more time focusing on customer support, marketing efforts, and business growth initiatives. V3Cloud is simply the fastest and easiest way to access the same VxDatacenter platform that's been trusted for years by mission-critical service providers worldwide.

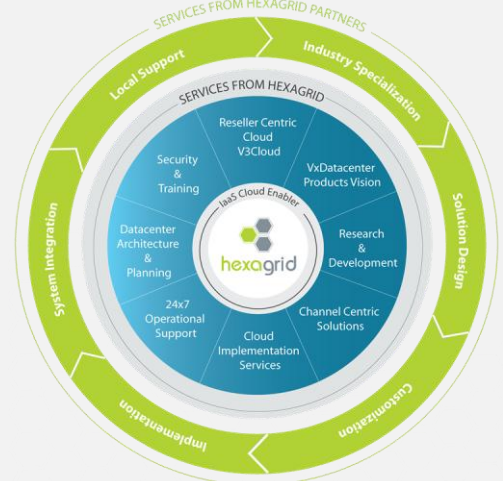

Hexagrid

Hexagrid's revolutionary approach to Infrastructure as a Service (IaaS) truly simplifies virtual IT management. Hexagrid provides all the software and support necessary for service providers to successfully build and manage customized private or public clouds that address their unique business needs. From basic everyday computing to intensive high-powered operations, Hexagrid solutions enable its clients to immediately generate profits by reducing costs and increasing efficiencies.
